

ST. LUKE'S HOSPITAL

MANILA

July 16.

Dear Dad. I was glad to get the letter you  
wrote just before leaving for Idaho. I am ashamed  
of myself for not writing sooner but it seemed  
that when the heat came on I sank into a decline  
as far as writing was concerned. I didn't suffer  
any ill health but just completely lazy - I never  
have had time pass so quickly as since I  
have been here. My two years will be up  
before I know it. By the time you get this I  
have only about 2½ months to go on my year  
internship. I suppose you will still be in

Idaho & I'm writing this there. Don't forget  
to write me all the news. I don't hear from them  
very often but suppose they are all well. It must  
be a busy season there now.

It seems that down days that when ever a person  
is or what ever they do they are working for nothing  
but from the way flour & meat is going up there  
ought to be a better market.

F.D. is very much pleased at his new job and  
it seems that his new boss treats him with more  
consideration and intelligence. He has charge of a  
new bus company - about 85 busses. Mr. Marman  
(the boss) asked him what he intended doing when he

## ST. LUKE'S HOSPITAL

MANILA

got in charge and he said he intended looking things over thoroughly before making any statements. That seemed to please him.

Baguio is a lovely resort in the mountains with almost temperate climate. It will be good for the whole family and there is a nice private school for my. I probably won't see them much often than you will from now on F.D. may come down once in a while but I don't expect Ruth & the kids ever. If I ever get a vacation I'll probably go up there for a few days F.D.'s Ban took him up by plane & he

quite enjoyed the trip. Ruth & kids went up by train. The Company is planning on furnishing them & a new Buick car for business and private use. I hope F.P. gets in line for some good investments.

I'll probably miss them running in for a few minutes now & then but I'm so busy time does not drag at all.

I won't ask a lot of useless questions but will expect you to tell me all the news and maybe stimulate the others to write now & then. Tell Norm the coat I was to have sent was given to Ruth & she needed it in the colder climate

Hope you are well & not having much trouble with your rheumatism. Love to all  
P.S. how do you like the 2 new grandsons? You loving girl Beulah.

Dingle Idaho  
Aug 11 - 33

My Dear Nora:

Just got ready to write when J.R. came with the mail & there was a letter from Ida & Beulah so here are 3 letters toans. right now it is 5 min. to 12 Q.C. Well I used the M. Bell last night & am feeling pretty good to day. Not going out as my car is out & can't get it fixed till to night so am writing. It is warm day & cool at night. Like Fall.

Haying is going very well. A lot down & no rain yet. Have had none since May & a dry summer & looks like that Fall is the same (I hope so) Have a big hay crop the largest ever. Grain not so good plenty Hoppers. Grain of all kinds is getting higher every day & those that have to buy know it. eggs cheese butter fat round 20¢ & all stuff but wheat has not gone up much here.

The boys have only 2 boys helping hay & are doing fair well but not keeping up to the mowers. Had to lay off 4 da & let them catch up & now they are behind & stuck. Started 2 mower again this morning want to finish before the first. No sale for anything so can't raise any money. Hope things are coming off there. Did my best to get the matter on the policy fixed up & hope it has gone thru by now & have been looking for word every day. Hope you get Hansen seems he is Crawfording you get the judgement & some day he'll come across I think. Queer he has begun to work Collard. Lookout - Will Rose & you must be having a good time. Keep it up only young once in a lifetime. Am finding out a lot of things that go show how the 2000<sup>00</sup> debt is here, don't ask question but am learning just the same. K.D. is kind of looking for you soon. Hope you can come as they all want to see you & will do you some good just the same. Am still mowing my car some every day till to day been in the hay field 4 or 5 times & enjoy it fine. Am laying out a lot of work to do as soon as Hay is up to date & all well.

RETURN IN 5 DAYS TO
