

Hamilton Nov 20 - 33

Dear Brother:-

We surely were glad to
hear from you again and were
much interested in the pictures.
I am sure you could tell us many
things that would be very interesting
to us and we're mighty glad you
are all left to tell the story.

We were awfully glad to have
Mitchel drop in on us only he
just stayed a minute. Now next
summer after you leave Calif. lets
count on you coming back to
Diva for at least a part of the
summer anyway and my wife bring
Hera with you. I would like to
have a little quarrel with you.
You say you are going on borrowed

Cross up 20 - close - yesterday.

III
wrong? Mitch is sure a busy man
these days trailing trucks for cows
and ~~vice versa~~ still has his load
of big cattle. The others are all gone.
hope these may go this week but prices
are pretty rotten. Automobile business
isn't so good but might be worse.
Bulah must be coming right to
the front and I know she has worked
for it - and deserves every thing that
comes her way. If all of the children
in your family that call you Dad
are as fine as those I have met -
(Mitchell, Lee and Bulah) then you
have much to be happy about - you
and Nora. Why Gee I'm so proud
of my one that - I try to keep up
on my wife all the time.

The days are just beyond description.
warm, sunny, windless you and entirely

II

time. My teaching has been that -
we never are on borrowed time. The
kidneys are the weakest organ in
the body and they are made to last
150 years. Of course they naturally
need some care, just like any other
piece of machinery, we take good
care of our harvesters and threshers
and let our bodies shift for them-
selves. just dump any piece of food
that suits the palate into them
and then say Oh well, I've only so
long to live any way. Jesus said, "Be
ye impure in all things" also "If
ye keep my laws I will increase
your life by fifteen years" "I will
render you strength" etc, and we
do know that He always keeps his word.
I think both you and I might
have a fair chance of living to be
a hundred. Be fair now, and I fear

Your brother's name
is he liked me
to safety?

14
too nice to stay in idle. but Sunday a
week ago did we have a dust storm. Oh
My! had company down from Los Angeles
and all went to the farm in P.M. dust
everywhere, nothing seems of normal
and to cap it - all a twelve year old
boy in the crowd shot - milk - not serious
but doctor could not get the shot. it -
was in the right - breast and quite
deep. just about all now.

Well my brother, I've done a good
deal of writing and said but little
but anyway I hope you will answer,
and if you hear any thing that seems
like it might be an earthquake
just throw those cutters and rue.
Wasnt that - Brooker Hunt murder
terrible?

I like to get your letters.

Sincerely
Mary M. Pease.
