

June 20 1930

Dear Mammie.

Just discovered I haven't answered your letter. Have been so busy - repainting my furniture and sewing shirts for Fabrian & clothes for the children - besides not being in a letter writing mood. We are indeed happy not to get contacts with measles etc. such as states children do - Altho in Manila <sup>where</sup> children mix enough to allow some diseases - whooping cough etc to circulate. My family amuse each other so they aren't often with other children - my kids don't have any sense about our dog tho. even the baby puts her hand in his mouth.

Nora + Bill treat him like a brother.  
I think dogs can carry and give kids  
worms etc.

Katherine is growing - can walk  
around her pen & bed at 6mo. sat up  
with ease and crept at 4 - Here is a

picture of her at 4mo. She has heaps  
of personality. Nora was such a quiet  
baby. Katherine struts her stuff. How  
nice to have a number of children. They  
can teach each other - And stimulate  
each other to learn. I could never get the  
- Rick out of money, travel - having nice  
things etc as I do out of these three  
children. What I enjoy most is their  
being together.

Will soon again.  
Paul
