My Dear Girl!
Just a word, Jean & V.W. & kids called in on their way to P.S. to poison squirrels. Girls are going as far as the Springs and swim till they come back. It is now 5:00 P.M. Gene was home over a day and never said a word I went down to phone and was surprised Helen & Ida was in the house and never mentioned a thing about him being there. When I stepped in there he was just look the same old way. No change as I could see. He had my mail & your Gov. letter for you. I asked him why he did not forward it he did not know, I told him he had better forward it so he said he would and put it in his hand

Had in band in front of forehead
and was going to run round and
put out poison. So I had him hand
it back so I will forward it tomorrow
Some people have funny ways of
doing things. I had lunch with them
I asked a no. of questions all leading
one and get most ans. yes & no.

So I am glad you are all. If I
had not of called, don't know if
he would have taken the time to
have let me know. It's all the same
time. Louis came home I think the
same day, not more than one later
Look very good and like Oregon.

Had a letter from B & she
is not coming for 10 da. or 2 wk.
you see I will get all the cleaning
done I have a girl 15 yrs. old from
Ark. & Norman doing the work
she is a good worker & by keeping them
a part I get a long fairly well
like the girl she is a farm girl &
can do like Hazel most everything
good & strong & husky

and willing, I just not get a side to do
a thing for me. Will be there in 2 or 3 days,
more and sure will be glad

Mr Oles said they saw where Soren Swanson
died. Beulah said he was of. for gall stones & took down
with double pneumonia & ~~was~~ very sick. You know
he was not as old as I am, some room for that.

You see Dug & Milk or any of them have
not written me a word since I left. More
room for that Well I guess if it is K. so I'll no-
worry let that job for the other fellow

Well I could rattle on but guess I'll no-
it is time to quit & see how the girls are coming
Mrs. Ton Nelson is over Dr. Tree Moulton, under treatment

Has been very sick, but Pop said she
was improving fast & getting
better

Things are not getting
better and I am sure heading
for a big bump this Fall so
I am to understand, Well I've
looked for it, as I have said &
coming events cast their
shadow before & so that is
that, Have several opening of at-
tack & damned poor defence but
these things come but never
with out warning and I sure
have gotten them so now
settle down for the seige, with
not chance of winning

Am going the best I can
as I have a many a time be
fore. Well I am still looking
for you to come with the rest
But if you don't it will
have to be OK. All
Love as ever Will,
