

Dingle Nov. 9-30

My Dear Nora,

I have been writing quite a no. of letters short ones and this will be also. I am wondering how all is at 929. Last night peculiar conditions took place here as have done before at such times events have hapened some where. <sup>929</sup> I just thought and wondered if it might have ~~been~~ been at 929 of course it is not your custom to tell much a long certain lines and you don't care to know it is all right. Little Denis is quite sick to night and Rodney & Norma are worried about it. K.O. M.A. and W.R. are all fine just 24% ago yesterday. The boys grain was in shock & it storming one 100 & 30 acers. and last night it is all in bin & all the plowing done where the bundles stood & we still have fine weather yet - just a little cloudy to night. Many little events are occurring daily to many to mention. There are so much to see & do when it comes to closing up business at the end of a persons life especially when the little details

have been lett slip by. I have worried a lot this  
Summer and am not out of the woods yet.  
So many things I counted on have failed to  
materialize. When these slips come it sure  
changes plans & holds up the game. I wish you  
were here to night but you are not. Just  
like many other wishes I have and most come  
off. Will Rodney moved in the S. room and have  
just started the radio up and it has got my  
goat there is a jib good night.

Will.
