

Hamilton Nov 20-33

Dear Brother:-

We surely were glad to hear from you again and were much interested in the pictures. I am sure you could tell us many things that would be very interesting to us and we're mighty glad you are all left to tell the story.

We were awfully glad to have Mitchel drop in on us only he just stayed a minute. Now next summer after you leave Calif. let's count on you coming back to Iowa for at least a part of the summer anyway and try to bring Kira with you. I would like to have a little quarrel with you. You say you are going on borrowed

wrong? Mitch is sure a busy man these days trading trucks for cows and ~~for~~ ^{vice versa} ~~for~~ still has his load of big cattle. The others are all gone. hope these may go this week but prices are pretty rotten. Automobile business isn't so good but might be worse. Beulah must be winning & right to the point and I know she has worked for it - and deserves everything that comes her way. If all of the children in your family that - call you Dad are as fine as those I have met - (Mitchel, Lee, and Beulah) then you have much to be happy about - you and Nora. Why Gee I'm so proud of my one that - I try to keep up on my toes all the - time.

The days are just beyond description. warm, sunny, windless you and entirely

cooler up 20-25 - ch - yesterday.

Your transwoman friend is told to write in Dr. Morris at present
How is she held in your locality?

time. My teaching has been that -
we never are on borrowed time. The
kidneys are the weakest organ in
the body and they are made to last
120 years. Of course they naturally
need some care, just like any other
piece of machinery. We take good
care of our harvesters and threshers
and let our bodies shift for them -
selves. just dump any kind of food
that - ruins the fatate into them
and then say Oh well, I've only so
long to live anyway. Jesus said; "Be
ye temperate in all things" also "If
ye keep my laws I will increase
your life by fifteen years" "I will
renew your strength" etc, and we
do know that He always keep his word.

I think both you and I might
have a fair chance of living to be
a hundred. Be fair now, and I fair

¹⁴
too nice to stay inside. but Sunday a
week ago did we have a dust storm. Oh
My! had company down from Des Moines
and all went to the farm in P.M. dust
everywhere, nothing seemed normal
and to cap it - all a twelve year old
boy in the crowd shot - Milch. not serious
but doctor could not get the shot, it
was in the right - breast and quite
deep. just about all's now.

Will my brother, Dick done a good
deal of writing and said but little
but anyway I hope you will answer,
and if you hear any thing that seems
like it - might - be an earthquake
just throw those crutches and run.
wasn't that - Brooke Hunt murder
terrible?

I like to get your letters.

Sincerely
Mary M. Pease
