

now.

I hope Ken will remain well - he has good shoes and overcoats, so keeps warm and dry. Didn't you think he looked fine?

To me, Dad isn't gone. He was so happy in Boise. Talked such a long time with me about our home and ranch. I always hear and see him like that.

He received Copper letter from B. with pictures.

I squeezed the baby for you.

Mother, those were dish towels - some day I'll make you

Dearest Mother,

I have been thinking of you all day. I can just see you working around your garden, or looking at your roses bushes that have been just pruned. It would be grand to peep in on you and have a good visit - I am so eager to see you and so is Genevieve Mae. Remember our breakfasts together? I do so hope you'll be up here next summer

and you must come over to my place often and sit on our nice porch.

Ken is working every day - he is feeding now and that takes plenty of time. He works on the kitchen cabinet every spare moment, but we take a little time off for pleasure once in awhile. Last night the Spencers and we went to Montpelier to the President's Ball.

Mabel took care of Genella.

This winter has been just grand - only two cold days - some of the scenes have been gorgeous.

Thank you for your lovely cards. Christmas and Birthday also for your letters. I am going to save them for Genella.

Genella has been fine all along. We take her to the Clinic every two weeks, and Dr. Pitt checks up on her - says she is perfect. She laughs
