June 7, '36.

Dear Mother:

I like it is I do say & don't just drooping
a little note before retiring. It's just that the day
should be one of the "Parents' Day". So we are all
joining in wishing you many happy returns
of the day.

He has planned on a little trip today
but that was pretty well spoiled when patients
began coming in at 9 a.m. so that we finally
did get a way for the heat & s.m., but certainly
I had enough calls to carry on to 10:30 p.m. I
has been quite a busy day after all.

We are all quite well, even the baby
David William.

There's having very nice weather here
and it has lasted for quite a long while this
year.

I was talking to a heart specialist
a short time ago, concerning your condition
and he felt that if you could control your
activities so as to not increase

your blood pressure unduly, that
there should be no danger in your taking
the trip to Leeds.

Now Beulah has mentioned the riding
the car, but that might be rather hot unless
the traveling was done at night, that would
be difficult with the children.

Did you take a trip to the mountains?
if so how did you react? O. D. S.

I'll everyone here for us and wish you
as possible health & happiness

Lovingly yours
Doug Lee.
