

leaves, but it will be nice to see a bit of bright color in the window. I often think of your many beautiful flowers. The children were talking of them this morning. We hope to wait a long time for sure. But what a fragrance when the apples blossom and then the lilacs bloom.

"Baby" is growing and doing most all the time. He quite enjoys reaching for things and scooting along on his back. Incidentally he always manages to get whatever we have (in our hands) when we are holding him. He is so quiet about it. He had his first good sun bath here yesterday. Today it is cooler and cloudy. The other two are always on the go. Our trip is still a most pleasant memory for us all. Many thanks & love from all, Norma

Dear Mother

We were truly pleased to hear from you & it was a treat to learn that you had had such a fine trip and visit. I think it was so nice for you to go. I should like to have seen the little newcomer, too. Now there are three little boys in the family who are only a few months apart - rather unusual. I'm so glad Douglas and Lucile's wardrobe since they want it so badly.

The truck arrived in fine shape and what happiness for the children! It looks so nice. Ben has painted it beautifully. Sonny would like so much to appropriate it as his own entirely if

definite. It is lovely listening to the many
different songs of the birds in the morning
haze, &c. Soon it will be blossom time
the hurry and bustle of getting the ground
ready for and actual planting will
be in full swing before long at this
rate. A busy busy time.

We have some 2850 eggs set now. I wish
you could see our machines, especial-
ly when the turkeys are hatching. It is
quite a sight to see so many balls of
soft down on one tray after another.
Our eggs are very well proportioned and
extra large. It certainly pays to breed
up and keep only the best.

One of my little geraniums is about
to burst into bud. As yet it has very few

only Rhynchos would say you
had like the moment. They say that
you must sit both in the ground
and in the sand box. Thank you
both so very much!

I am glad the bank arrived safe
I had hoped to send it off
then that perhaps it came while
you were away.

It is really surprising to find
and feel the quality here. On
last Sunday she got that engaged every-
where and the day after next
and full of happy people away!
now taken in very little to do with
in fact only for the electric
phase. Each night we had a
light show of gold marks. I find
the fields showing an immense
black green haze. The morn-
ing a Francis almost made
the haze become even more
