March 18, 1944.

Dear Mother Beam —

We were all very glad to get your letter, wasn't feeling very well and just kept putting off writing. I was also expecting Wesley to be dropping in on us every day and on the 15th Helen's birthday, I was sure he would come but he did not. Then the next night — I looked out and he was shutting the gate. We were so glad to see him and have him home with us. He looks fine. But he has a cold — an awful cough and says he does not feel good this morning — in fact he is in bed yet — almost ten. I tell him to stay in bed all day, but he says he told a fellow he would sell him some hay and would measure it at noon. I want him to let someone do it. But he says he will go it is just up here on the Dayton place. He says it won't hurt him to go out that far. He did not go out yesterday until night

wrote to him - with Helen - and I was glad you had such a good

we went down to the Relief Society party
threw down in car. Had a big chicken
dinner. Set long tables in the top part
church house. There was a large crowd
Every one seemed to have a good time
Had a nice programme in the large part
Then moved the benches back and dance
The little string band played - It was fine
Every one was glad to see Stealy back,
and think that he looks better than
they have ever seen him.
I forgot to say that Mitchell and Mabel
were there mabel sat table and took
chicken and noodles and I had
a cake and peas. Helen gave us
readings. She did well. And it was
a bad day snowing and blowing
a regular Bear Lake blizzard. Cars
were covered so that you could not tell
one from the other. And I wanted to have
it nice when Stealy came and in fact
it was the worst winter we have had -
have more snow now than ever this year
To day every thing is piled high but the
sun is shining and every thing looks
beautiful. I guess Stealy had as bad a trip
we did to millions - He says it was worse
I guess he told you about it. He says he will
