Dear Mother,

I have been going to write to you and to Jan for some time but have just not got at it. Maime says that it takes me such a little while to write that I should try it when I ought to. But there is a hitch there. One of the big reasons that I seldom spend more than five to ten minutes writing a letter is that I am in the mood to write and know just what I am going to say when I start out. If it takes me days to get in the mood, so the delay in getting started.

I had summer here for a week or two but now for several days it has been winter, there was about two inches of snow this morning, but it has mostly gone now. From the looks of things it will start snowing any minute now.

I went to Pine Springs a week ago Sunday. The snow was all gone but the big drifts there and I thought I would be having them by now, but looks like it

would be a week or two yet.

As for our new house, it is ready for the plaster and has been for more than a week. George Clark thought he could get a good plasterer to come with him but he is here now with out one. Now I am trying to get one and my job started next week.

I have had the furnace in since shortly after the holidays and it is so clean. Manie is in Salt Lake with her mother who is very sick. She wanted to come home before she died, she said, so Annie and Wason went down to get her. She was too bad to come home so Annie stayed and Wason will go down again to get her if she gets able to stand the trip. If she get no better or worse Annie may come home with K.D. when he goes to meet Ruth.

Your letter will have to do for Jan too. I will try and write to her in a few days, when I get to going on the house. We all send our love and best wishes to both you and Jan also to Ida and Ned.

Wesley.
