

Must prepare  
my lesson this  
afternoon & go  
to the class. I  
should have  
prepared it  
instead of writing  
but she talked  
in the most in-  
teresting & in-  
teresting manner  
I shall not take  
any more  
longer and  
need anything.  
I'll try to  
not write a longer  
letter for this  
time. I'll hope  
you will answer  
them all.  
Love  
Alice

would be satisfied with seeing  
no more of the world than I  
see at home. Do you think your  
folks will be disappointed because  
you do not come in October? It would  
be real nice if Frank would go & take  
some one with him - but I hardly  
think he will.

I was examined last yesterday  
after school closed. It was a  
written examination but I do  
not think I was over 2 1/2 hours  
passing. I have not yet got my  
certificate so do not know how  
poor or good it is.

Will draw something the other day that  
reply made me smile. About half way down  
the Babermacke block walked a young man  
& young lady hold of hands. They stopped, he  
looked about to see if any one was looking, seeing  
no one he took both her hands & oh how they  
kissed. I could hardly keep from laughing along  
don't think she next day, but would not say anything  
to make those kisses remembrance unpleasant.

Commencement  
for I have  
not the time  
to correct.  
Be agreeable  
I've become  
& are there  
when you  
can.  
Will love  
Alice

Logan Aug 28<sup>th</sup> 1892  
At School 12 P.M.

Dear friend Will  
Yours written Monday & Wednesday  
reached me yesterday evening - I  
was very much pleased to get them,  
but so sorry to learn that you were  
very much disappointed - I think  
it best that I should teach this  
one term only, don't you? I have  
engaged for no longer - although  
I know they will want me. You  
said you were going home & asked if  
Koni would go too. She answered "Yes".  
She will be ready to go when Will is  
if it is anytime after the 30<sup>th</sup> of Oct.

Do not think, Will, that I am  
working hard enough to give me the  
head ache, I have been feeling

real well & have had the head ache  
but one day since school began.  
Rosie has not yet come home, so I  
have a part of the house work to  
be done & I have to go to the temple & I have  
to be up early to get all the mor-  
ning work done before going to bed.

Rosie has never wanted to come  
home since we were there. Pa  
has threshed & they have brought  
five loads of grain home & we ex-  
pect several more loads today.  
He had, after paying for thresh-  
ing 305 bushels. Archie is down  
now. I do not think he has had  
very good luck delivering his  
books. He wants you to send  
me a letter to Moore omitting  
date & number of dollars. The  
will get what he can & send.

I was surprised when  
you said I had sent you

some stamps. How many were  
there? I had stamps in my  
paper box with my paper &  
envelopes & they must have  
slipped in when I was not  
looking for I knew nothing of it.  
So you must excuse.

How would I like the trip to  
St. C.? Ever so much! If it were  
possible, I should like it very  
much, but it looks almost im-  
possible to me. The idea of going  
there almost turns me - I,  
whose eyes have never looked  
beyond the borders of my dwelling  
place - to think of such a thing!  
I have often built castles in the  
air, years ago, of how I would  
travel some times but they all  
fell to the ground the moment  
I would think how improbable  
it was. I have always said I never
