My Dear Girl,

I am here alone all day and I don't think B- will be here before 6 oc as Milton seems to be coming down with the flu and she is very busy in the office and making calls. She helped In- one day in E. Oakland in an appendix case and just a few day helped Dug. with a gallstone a bad case but both done fine work. We are invited to Dug's for Sun. dinner as we came from Milt office she droped me off and then went to Albany to meet Dug and seen Lucil there and got the invite.

Well they will have a very fine office. 10 large rooms besides clausets and several up to date inday. You will have to come with Ida and see them. Milton does not seem well and several days did not get out much. Sa he had 15 or 20 ovvid calls besides all of the home calls and B- made several. They seem worked hard but will have it better when they get moved the 3 or 4 da. B left me home and called and tooked me to see the Chinese Clipper come in it made it from P.I. in 5 da. It was a grand sight to see it land.

JR and we were down and seen them both in at same time. Since J.R. left it has been to P.I. and back and gos on the 15 ms on 3th dry.

Say I am sending you the biography of The King Fish. a book Mr5s. Malack loaned me. I read it and B and I red it again da before yesterday I met a lady while waiting for my treatment - and she and I got acquainted same old way and when her turn came before mine Mrs. Malach to take her in we were talking and she introduced us and said she was the lady that let her have the book (you will see her husbands name it like he owned it). It came round in this way. I asked her where I could buy one. I wanted one and I wanted you to read it. So she send it you sight in the present of Corene so I'm sending it for you. Use your pleasure about reading it. If you don't let the Wrights have it after and tell me. If you enjoyed it. I am glad he wrote his own byography and backed it up by reference.

The Book (?) I can't get to read it and when thru return it. Would like to have the chance to red it. There are many things worth while in these days that are doing. I wish I had 15 or 20 yr of the best-time in life. That is the yr. I could enjoy and like to read and remember. I sure would appreciate them. The more I see the advancement of the great changes that are taking place and greater ones that are coming up that mature and come to pass it makes one want to see and be present at the time. That even taking place in France will make history more in one yr. than was done in 1000 just from 1900 back.

This yr will I believe will be an eventful one and how bad this country need men like the King Fish. That are able and as a dare to take the rights of the poor people. Old Hoover is trying hard to get a chance and be the big boss.

Well, I'll tell you about the folks. All are well so far as I know. The young president is doing fine and they are looking for his Gr. dady to be here and bless him next da set for that occasion and if I am here I will get to see him. Milton has been put in councelor to the Bf. Dug is getting his house finished. You know he bot the place he had his offic in gave \$10,000.00 got \$4,000.00 for his place he is adding 2 or 3 rooms on and will live in same place very nice to. Flours are looking fine weeds and grass are over knee high and every thing growing good. Suppose things are coming on good there. Your roses must be looking o.k. and the snow banks are good and big in B L.

I have had 5 treatments and when they moove I will be getting a day so they say. Time flyes and April will soon be here and I am hoping I can be good enough to go home. I think a lot a bout it and what I can do when I get there. The problem gets bigger every day as they roll by right now. I am having a good time. B-takes me out every day and we have been to one show and we enjoyed it very much. It was hard for me to set so long, but it was good.

Well, I thot I had other side blank but not so so send love and sign off.

Will
