

Wm. J. G. & Sun. first-

my Dear Girl,

your discouraging came just a  
day or so ago. I sure was disapointed and  
discouraged. But after a lot of tho- and  
reasoning I got some consolation in this tho-  
conditions had a lot to do with it. It might  
have gone to 500. mine I think would have  
reached 1000. Now that you are at Milton's  
and Helen's I hope you will soon be at  
normal. I sure was expecting a surprise  
by you dropping in some time without notice.

Well here is another crucial moment in  
time as it marches on and you will have  
to do as we have done in the past - just think  
out the best way and act according. It soon  
will be 50 years we have had quite a no. of  
things come up we would have had otherwise

but - we took the best way and I guess  
turned out for it all good. I suppose over it  
so will this. Now think it over & take the best  
& your Dr.'s and it will be O.K. with me if  
it might be better conditions later. Let Hope so.  
any way

well it rained quite a shower to do. & look like it  
might give us a lot more to night. We had a  
lot of hay cut, in swath. Bunch, & winrowed  
You see the boys are stacking and I am cutting  
& raking. I looks funny I have 3 men & am  
running a mowers & rake. Have to be on the job  
all the time, go out in morning drive the Puddle Jumper  
home for noon & back a gain. I do the I can't try to  
do things I can't & I get all kind of results.

Made a new yard & I tho I could do some  
fencing. I dug the corner hole & set post - but it was  
a little to much. the post was a green aspen &  
heavy I sawed it off placed it & tamped it &  
that was all. Bridges are all in bad shape & I  
work at them so I can go over the place &  
see to the work. Have been out seeing & ditching &  
riding home on the dump boards & one night  
I lost my best crutch & I've been only using  
one. So I am improving. The lump in right knee  
I have it located so it does not bother me any more  
all the vice lumps are gone in both knees & I  
have any more pain in either my left hip is  
better. I can bend it up so I can rub lmanent  
on knee & a little way below the knee. Some day  
may have pretty good use of left leg. There is 75% against  
showing up in other ways. 26 yrs. is the biggest drawback

Well I could go on & tell you a lot more but  
but will wait till next time I have such a lot to do  
do it so slowly it take more time than I ever expect  
have of. Give my good wishes & love to M.P. Helen & little  
see, just a little I think. P. P. tanna max bet the rest to

Dingle Wed. Morning  
8-7-35

and here is a note to add.

The letter I wrote some da. ago, but it has not been mailed yet negligence, forgetfulness, & forgetfulness. The excuses and as I am not going out to the field for 2 or 3 hrs. I'll listen to the radio & say a few words to you first - before I forget it. Tell Bill I took the last one of the little red pills he gave when there last and if he will tell you the same & kind & you send it to me I get me some more as I find they have done a lot for me. Turkey feed (corn meal made by his hammer mill) with them seems the best for me & does the trick.

Well I am out every day in the field I am running 2 mowers & raking & the boys are doing the stacking, a good crop & I am trying to get things done right - but so far not so good as last, but - I'll see if I can't make a little money if possible. I sure need it. If my rupture did not bother me so much. It is getting a little worse every da. Hope it does not get down till I get - heaving off my back

The Season seems to be just a little a  
head of usual, We seems ours is very good  
& it will give a little proffit if no  
accidences come a long It may fail  
chances are good for a hail storm may  
come any da but, I hope we are not <sup>to</sup> get  
to get the benefit of it but, it might be. We have  
been having some very sweltering days & very cold nights  
(Will just a little secret & don't you tell unless you  
want too. I think J.K. & N. are arranging for a new visitor  
Nothing said not even a hint of any kind but it looks  
very certain to me, They are working hard & seem  
to be lucky in most ever y thing but calves  
K.D.'s cows have all heifers calves & theirs all bulo one  
heifer & K.D. one bull lock is very anxious to sell  
to calico cows & has to admit I was right about them  
This is the fourth time that this ranch has tried the stum-  
of dirring & fippled it sure has cost the ranch  
more this time than any other. The separator has  
not run one time since K.L. left & we are sending  
about 40 gal. of milk to the factory & it does not  
pay for the getting it ready & we have all the other stuff  
to do for the farm of it. Pasture, investment & all  
the bother is our proffits. Some results as we have proove  
3 times before now I am busy figuring on sending  
them to Cal. & sell here. They are a fine bunch of the  
kind but not my style. Will is  $\frac{1}{4}$  to 100c.  
Love as ever Will,

Acadia Ranch  
Dingle Idaho.
