

Wing 23-36

My Dear Girl:

I got your nice letter and carnation & beautiful vice. It sure made me feel good to think you were feeling well & so fine. Hope you keep on that way. Don't you think you are taking a big risk. Just send it thru the mail cheaper and safer to do so.

Well I have had several letters since I wrote you has just been busy at Laramie & have reeked the candy store & have a shed & will make sheds from the spoils. Every body well here so far as I know. Ken is working for me but puts his time in for the rest he is haying for M.A. & J.R. wants him to see to his turkeys for 3 or 4 dollars while he goes to S.D. to a meeting about turkeys. Ken is counting on being there for first. Just leaves me in a box same as ever. Well. it will finish some time I guess.

Winter seems here already & I sure am not ready for it. Had a letter from Kansas City about my hay. you see the Gov. is trying to get men with feed & men

with cattle together & benefit both. Rates on
R.R. are good and there seems a good
chance for a good price if I can but
just land the man that wants the
hay. Which I think I will but it may
be later. Quite a question! It may
take till the middle of Nov. or even Dec.
Late hay sure will be in demand & a good
price. If I but just had enough energy
I believe I could make some money.
There is sure a lot of stock that are
badly in need of feed & will be worse
before Spring. Without money & short on
credit Age & Winter coming on a debt
crowding hard, and to meet it is just
a hard job. I just set and think & think
G.D. sent me 50, same as you but I just
had to spend it as usual so no
Dinas money but its same old story!
So I will just forget & keep on

The Nov. winds sound clear & distinctly
There is no doubt, frosts every night. Mr.
sold his lambs yesterday got a good
price. Mr. & J.R. had bad luck with
theirs & don't know just when they will sell
Will try & get cattle in next Mr. then some

ditching & shed building, which will keep me
going! I have not been on the job one
day this summer just stay in all

the time. I was 7 da. in Lava getting the
shades down & ready. It was quite hard
on me. But they are here & I'm glad.
Looks like snow and M. has not
cut his grain at P.S. is out
surveying & letting 1500 ϵ crop go.
but that's a big mistake wheat

going up every day ^{and} bids to be a
big price by Spring. J.R. & K.L. have their
grain planted. We have out thrashing
done & M.W. has not cut his yet

If he just a good man to help him it
sure would be great a loss of the
crop will mean a little to him

There a lot to tell but I guess you will
be tired when you get this read

J.B.'s turkeys are the finest he has ever
had over 3000 of them & I'm hoping
he gets a good price they should bring
him between 12 & 15 thousand dollars
if just normal conditions prevail if a little
good luck will win & bad sure will count

4)
Hard against him, They are working
hard & either are not feeling the
best. My it looks like snow just
now. If it does it sure will be
to bad. The frost has done a big job,
and the Autumn decorations are
grand highest ever. The first night
turned to vine on Porch leaves all
black so hard & severe it did not
give time for the colors to appear at all.
Well I have been round the lot looking at
every thing. The trees we planted 40 years ago or
longer are most gone & all that are left are no
good. Time Marched on. There comes a change and to
all appearances the end. By the way you will
remember the shells I had most ready. Why if you
will send me the beads I will finish the postion
I started. it will keep me interested while I am
listening to the news on the radio I would like
to do it. send the twine to string them on & I'll
make something nice & you may have it. Is it
a go if so rush them a long at your earliest
opportunity. The kind you may like. They will send one
kind dust and leaves blowing thru the air.
Best wishes, Love to all Love to you as ever I'll

A. E. Ream
