

P.S. When you write tell me what day M.P.  
Left L.L. and arrived (would like to  
know. I was worried about an accident by air.  
& have heard nothing since

Sunday Night

My Dear Girl,

Single

Just one week to night - Grix Wilton & I  
came from G.H. Hall's. & on wk to morrow M.P. & A.G. left  
left I don't remember much a bow - the events during that  
time. Jean went with them never came & said a word  
before he left. I have tried to recall something took place  
but it only seems like a dream <sup>and</sup> I guess it always  
will I counted as a nice visit from Milton Had  
a lot of things to talk about & wanted to show him things  
I sure counted on many things I had in mind to do  
It makes me feel like you say you do when you can't  
an optical when you want & keep looking & worrying about  
it till you do find it. Well in this case the opportunity  
has passed and it is up to me to forget it. G.I. sure was  
disappointed. It seems like Fall is here cloudy & look like  
storms. You know every Fall there is a gloom spell & melancholy  
times. When I was a boy alone & at this season of the year  
when the nuts were falling I would take my sack & bucket &  
make round all alone visiting the favorite trees picking up the nuts  
that had fallen since the last time it was there I remember just  
how lonely those trips were and how few nut I usually got for  
pay for time taken, not worth the while it took and to day and  
night has been surrounded by that very same unpleasant feeling  
and that's. G.I. has come and gone and it seems like a dream  
The feeling when I get back & very few nut in the sack <sup>and</sup> I think  
I will not make that trip again but I do, several time now  
no better results, just wanting to get some nuts to have for winter  
Now I think every day since I was here about the visit coming up  
but at night it's the same sack empty or very few nuts in it  
and that gloom feeling just as I had in those day with the  
laps of 65 years between. But to morrow one wk since he left

Will commence making other plans. The visit is like the Fall  
when there was no nuts to gather. I am not starting out with an  
abundance of courage but there is nothing else to do, just same old  
grind and the outlook poorer as I do not expect to reap any benefit  
from what I will be doing. It will be wholly for the good of others  
This is not a willing deed but a force put. It must be done & that  
is that. Rodney and I were talking 8 day & he said no one wanted to stay on  
the place. That there was inducement for him and he counted on  
quitting most any time. He has done well and so have all of the  
boys that have run it, so I figure he will clear 8 or 10 thousand  
dollars. But Bill goes over 1/2 that in the hole

Mani<sup>nd</sup> & W. W. called on their way to Pine Springs & also coming  
back. They had a letter from Jean he had arrived found everything at  
house clean got keys went in & was on his way to school

Sat. morning at 7:30 to the train for some place &  
school her and May came up Sat. night & bid me good by  
That is more than Jean did. She said she would write  
me some time. She said she has not any one what school  
she was going to. She was late no matter what one she went to

Well Sam tried and it is getting  
late so will quit. J. R. Has his turkeys down in  
the field and sleeps with them and it looks  
cloudy & may storm before morning and he has  
no help and may have a bad time holding them  
last yr. a storm came up & hailed & rained so hard  
he had over 40 lbs up & trod to death Has his  
car full. Say he does work hard & it will  
kill him if before many yrs. But he & Norani  
are making good but learning every cent  
they get she is her health sure does a  
lot of work & does it smiling seems strange  
but she does & heartfully Give my love to all

Love to you as ever & am glad you  
are improving hope you get well & strong (Bill)
