

Kept them in her diet - I shall  
have the diet she had at  
your house. It was the best  
of all the things we've tried.  
O, I do hope she gets better  
soon. If not, I believe I'll  
take her down to Long Beach  
and have you help me. She  
is wonderful otherwise. Scarcely  
ever had <sup>had</sup> any colds in her  
life, and she's so cute and  
smart. My! She can just  
about say the whole alphabet  
and can count, and designate  
colours - she recites nursery  
rhymes, and just loves  
to have us read to her. She  
wants to help, too, like carrying  
out dishes, and standing on  
one side of my bed while  
I make it, so she can smooth  
the blankets. We love her so.

I enjoy your magazine  
and try to go to R. S. as much as  
possible.

Dingle, Idaho  
Nov. 6, 1941

Dearest Mother,

Thanks for your nice  
letters. I am always so  
glad to hear you are well.

I am sitting in the  
best window and it is  
so nice and warm - the  
fire is out. Genella is  
still sleeping but I ex-  
pect to hear her any minute  
now. Tex is trying to get  
his grain - at least a part  
of it and he is having  
some time. It already  
has been snowed on twice,  
and I don't know how  
many times it's rained.

Genella is quite a bit  
better at the present time.  
We are keeping her on  
certain foods, and not

- She gets: Breakfast
1. Prunes
  2. Milk (skimmed)  
1 glass
  3. Cereal (either  
shredded wheat or germade)
  4. Rye crisp

Lunch

1. Potato with onion  
or lettuce or both -
2. Rye crisp
3. Juice milk

Supper

1. Raisins or  
banana
2. Ground carrot  
with cottage cheese
3. Milk -
4. Rye crisp -

She may have cooked carrots  
or yellow or green beans.

We make good use of your  
"juicer" Mother, and I'm glad

you drew my attention to the  
fact that there are three  
pieces to it, otherwise I  
may have evast some.

We are keeping Henella  
on this diet because we  
have found she flares  
the least on it, but we  
are going to introduce  
other foods as soon as we  
are reasonably sure none  
of these hurt her. I think un-  
sweetened pineapple juice  
is all right, but of course she  
has never been cured so there  
must be even one of the  
foods we are giving her  
that isn't too good. He wanted  
to cut out potatoes but she  
likes these so well, and they  
don't seem to hurt her more  
than the other foods, so we're

definite in L. B. for Ken  
and this made him so  
unhappy.

Wesley is getting a  
beautiful house and  
all you folks will be  
proud of it. Mitchell said  
he would like to build  
and I do believe he will  
now that Lois is soon  
on her own, and Norma,  
well, they don't say much  
but I'm sure they'll have  
a nice house, too. I hope  
they build in Dingle.

Our home is getting better  
right along. We have had  
many interested spectators  
view it.

Lands of love from all  
of us - Ruth, Ken, Genevieve

Ken has been feeling pretty  
well right along.

Milton was here and  
worked on the vault. It  
is too bad the boys are so  
far apart that the plans  
go awry. Milton, I suppose,  
had figured that the boys  
were through haying, whereas  
the boys had been waiting  
for the plans to start work  
on the vault before haying  
time. I hope they will  
all find time soon to  
finish at the cemetery -  
there is the rock facing  
to do.

I am eager to see Florence's  
baby. It is a lovely  
child I hear. She says you  
sent her a pretty card.  
M. J. T.

Enjoy company so much.  
You know that Forest  
was at our home a  
week last summer.  
He helped at the cemetery  
and at our house. He  
was fine.

I received 1st prize  
on a blue larkspur

2nd on  
Pink larkspur

3rd on geranium

3rd on Salpiglossis

so I earned \$2 in all.

I was so thrilled I am  
going to enter next  
year again.

My pansies are still  
blooming around the <sup>front</sup>  
porch - gorgeous blooms.  
all the other flowers

are frozen. I have  
two bouquets in the  
house and I gave a  
nice bouquet to Norma  
yesterday.

I hope Ida and Beulah  
Lee are much better.

Tell Ida to write to me.  
I would like to hear  
about school, too, and  
Mr. Shiley - what he  
says because I quit  
teaching.

I really should liked  
to have continued teaching  
but I couldn't see my  
way out with Ken here  
alone so much of the  
time. Of course, we  
could have sold out but  
there wasn't another
