Dec 10-39-

Dear Mother:
I have been trying to write you for some time but first one thing or another seemed to interfere.

We all trust you are quite well & that you continue to remain well. Alta phoned some time ago to the effect that her mother had gone to be with you a while - That is very nice & we all appreciate her interest - Be sure to give her our love & tell her that she must call & see us on her next visit.

We are all quite well now except for slight colds. Now almost completely gone.

Kenneth & Ruth G. came Monday & left Friday morning with the cutest little baby girl which they plan on naming "Goswella". Ruth had a cold which was almost over when they left. They were very well pleased & we are sure she will be a great pleasure to them.

Milton family seem to be O.K.

Lucile & the three older children have gone to a piano recital at church today.

About a week ago I helped operate on a man age 50 who had the same trouble as Dad had - He only lasted a couple of days. In view of this incident I am happy that Dad has not had such trouble years earlier.

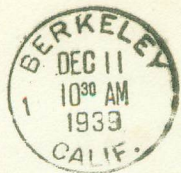

Naturally we all grieve the loss but it was better than many we all know who have gone earlier in life or left to suffer untold agonies for years.

We are always thinking of & praying for you & Mother. You must take care of yourself. Lovingly Douglas.

See envelope this for copy of my letter
