

school. He and Uncle Milton killed
a pig and pop brought some home.

It'd be fun to live there for a while
just to run around, and climb trees,
(even though I like our house better.)

Everyone is okay at Uncle
Milton's as far as I know.

I must be going now, so
please send that genealogy, if possible.

Lovingly yours,

Seanore Ream

Dear Grandmother:

Mom told me about the
letter you recently sent, saying you
had the most grandchildren in your
church. Congratulations. About
how many? I hope you had a happy
Mother's Day.

All's fine here. How about
Long Beach? Is it hot yet?

I'm getting along fine in school.
Last Report Period I got 7 A's out
of 9 cards. This time I got about 6.
We have art, which I love, and
next term I'm going to be the
first violinist in the orchestra.
That's pretty good considering the
large group we have. Marilyn
is a flute player. She plays
solos at schools. (I do in front of
my class too.)

Have you heard that there is a Temple to be built in Oakland in about two or three years. It's true, and some of us girls might get baptised for the dead then.

I wrote for two reasons. One - to see how things are, and, two - to find out if you would send me the genealogy I need.

Today at church I heard the need for us to get our Genealogy now, because of the temple I've already spoken of. I was wondering if you would please send me as much material on your side of the family as possible. Your parents, grandparents, your husband, his " " " " , your children, etc. I would also appreciate any pictures you could send.

I have a few nice books, and could

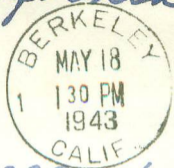

care for them, until they would be passed on. You could send the birth dates, where born, when and where married, and when and where died, and any other information. If there is any writing required to find the needed facts, I would be pleased to do so, and, if you wish it, I could send you the answers, or put it in my book.

I hope I won't be too much trouble, but I would appreciate this, and any histories about these people.

Dad is fine, only still working about $\frac{1}{8}$ of the time (it seems).

Quite a while ^{ago} we got some things planted out at Uncle Milton's home, and are expecting things to come up, too. Last Wednesday Dad went out there with Mom and Eldon and David during
