

Dingle, Ida
Nov 27, 1933

Dear Helen,

I just received your nice letter and instead of studying geography I'm going to write to you. I like school very well. Mrs Oakey teaches us music and language. (Mr Oakey teaches the 5th & 6th arithmetic) There is just five in our class. One, Gloria, Verdon, Merrel, and myself.

It hasn't snowed yet but it freeze enough to skate. I got a pair of skates last Wednesday, and can skate pretty good.

Lee is getting heavier, when we weighed him last he weighed $24\frac{1}{2}$ lb. He can walk every where. When he sees any thing he wants he just starts to cry. He has 11 teeth as near as we can tell, he wont open his mouth unless he sees someone open their mouth and say Ah. When we hold him he will stand on his hands and feet and look thru his legs.

From my
Cousin Lois Rean,

You ought to see him when we give him the cab or dog or let him get the calves by their ears, he wrinkles up his nose, shuts his eyes a little and opens his mouth and laughs.

You know that black & white cow we had. She dried up last summer & when she had her calf there was too. Jean went up after your cows he saw them. When he came back he said to daddy "you have a couple of calves up there" Daddy was so surprised they are red & white.

We just get Thursday and Friday off for Thanksgiving and maybe we won't get Friday off.

Have you had your hair cut off? We are going to have civics now I will finish after.

I have just come back from skating, golly we have a lot of fun. We have some of the best times, and some of the worst falls. Saturday there was more than 20 kids on the ice.
