Dear Wesley & Mommie:

We have been trying to locate your current address. It was your nice letter & card that settled our problem. We are pleased to know you are well & enjoying your work.

The past year has had some devastating periods spread over the entire world. Yes, the west coast is getting a soaking now. Fortunately, we are located in an area where flooding would be extremely difficult. Earthquakes would have to be real severe to equal hurricanes & floods.

We are all well. Our family was all together for the first Christmas since 1950. For us life seems to be moving along about as usual - Each day follows its successor so fast that it is hard - at times - to get enough sleep. Forrest will be leaving soon for his station at Aberdeen Maryland, where he is currently assigned.

We trust you folks are enjoying your work & good health. This nice to hear from you all.

Love -

Douglas
